

# Environmental Ethics

Philos 2342

Prof. Corey Katz

Spring 2017

TR 12:45 pm - 2:05 pm

Are all ethical claims relative?  
Is ethics even real?

What do we owe to future  
generations?

Are the emissions of  
industrialized countries unjust?

Do we have moral obligations to  
animals, plants, species and  
ecosystems?

What can the perspectives of  
aboriginal people and women tell  
us about environmental issues?

Is capitalism fundamentally  
unsustainable?
